

Yashmit V. Bhaverisetti

ybhaverisetti@ucsd.edu | (350) 229-1083 | linkedin.com/in/yashmitb | Github: yashmitb | yashmitb.me

EDUCATION

University of California, San Diego

La Jolla, CA

Bachelor of Science in Data Science

Expected Graduation: May 2028

- GPA: 3.89/4.00
- Concentrations: Machine Learning, Data Analytics & Visualization
- Relevant Coursework: Data Science with Python, Data Structures & Algorithms, Linear Algebra, Calculus for Data Analysis, and Discrete Mathematics

EXPERIENCE

UCSD CSES — TritonSpend

La Jolla, CA

Open Source Developer

Sept 2025 – Present

- Engineered a Node.js/PostgreSQL backend powering TritonSpend's AI-driven budgeting insights, supporting 150+ active users and 200+ monthly transactions

Musashi — Kalshi Prediction Market Pipeline

Remote

Lead Developer

Apr 2025 – Present

- Led development of Musashi's core backend API, processing 100K+ requests daily across 10K+ tracked prediction markets with full test coverage

Poseidon Holdings

Remote

Software Engineering Intern / Full-Stack Developer

May 2026 – Present

- Architected and shipped Poseidon Music Platform solo, a full-stack SaaS with automated Stripe payment processing, credit-based curator matching, and stream attribution analytics

RESEARCH & PUBLICATIONS

Croptimization

Online

Lead Researcher

May 2023 – Present

- Pioneered an ML-driven precision agriculture model achieving ~**95% accuracy** across multiple crop varieties and regional soil types, published in JRHS
- Analyzed **100K+** data points using TensorFlow, Pandas, NumPy, and Scikit-learn to power yield forecasting
- Shipped a cross-platform mobile app integrating these models with real-time weather and soil data, featuring seasonal crop calendars and yield predictions, published to the App Store for iOS and Android

Global Education Destinations

Egypt

HungerHeroes Research Lead

Oct 2022 – Dec 2022

- Conducted field research across rural Egypt, engaging local farming cooperatives, and co-authored an international paper on data-driven solutions to hunger; launched a food redistribution website to reduce food wastage

PROJECTS

Rewisp | Python, SwiftUI, SQLite FTS5, On-Device OCR

2026 – Present

- Founder & developer of an ambient memory app for macOS that captures on-screen text locally and answers questions using on-device models within seconds, no cloud round-trip required
- Implemented hybrid local retrieval, a promise-tracking system, and an MCP server for Claude Desktop/Cursor; launched on Product Hunt, #5 Product of the Day with 180+ upvotes

OceanOps | React, Python, FastAPI, Mapbox, Three.js, Google ADK

2026

- Designed an autonomous mission control system for Ocean Alkalinity Enhancement, with a multi-agent AI pipeline (Gemma 4) for route optimization and real-time fluid dynamics simulation
- Orchestrated an offline-first data pipeline fusing NOAA, CalCOFI, and AIS streams for edge deployment on NVIDIA GB10 hardware; presented at LA Hacks 2026 to industry judges and faculty mentors

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, Swift, SQL, HTML/CSS, C#, NodeRed

Frameworks: React, React Native, Node.js, Express, FastAPI, SwiftUI, Vite, Tailwind CSS, Framer Motion

Tools: Git, PostgreSQL, MariaDB, SQLite, Supabase, Stripe, Docker, Railway, GitHub Actions, Android Studio, Jupyter, VS Code, TensorFlow, Scikit-learn, Pandas, NumPy
